02 / KEEP LINGO UP TO DATE

# What if I’m asked to update?

If Lingo asks you to update, follow these three steps. You do not need to register again.

3 **Tap Update, then Open**

Let the update finish. Tap Open or return to Lingo and continue.

## See Open instead of Update?

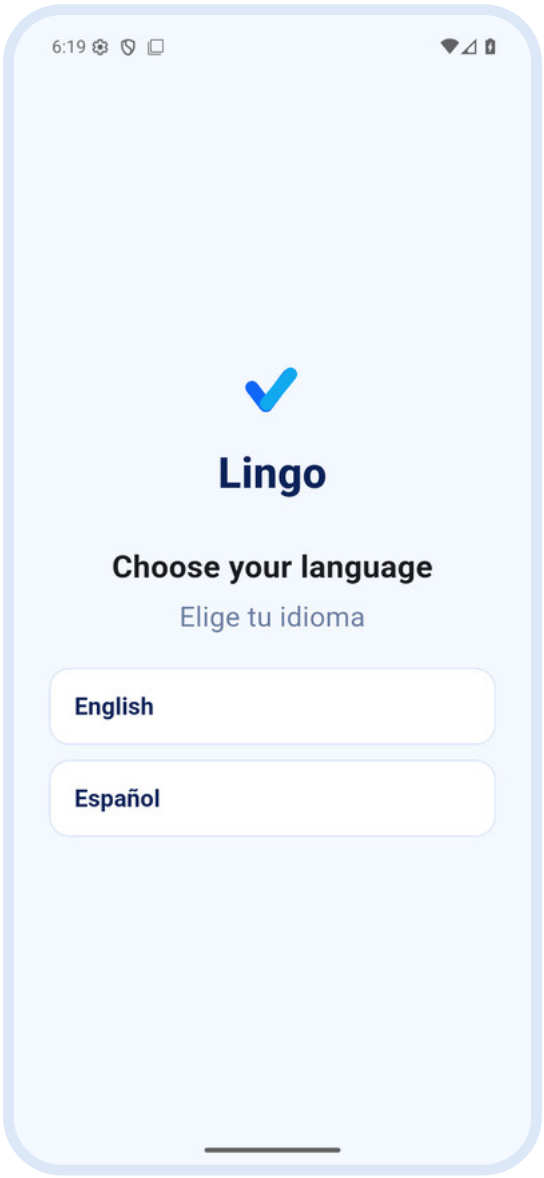

You already have the newest version offered to your account. A beta version may require accepting the testing invitation with the same Google account.

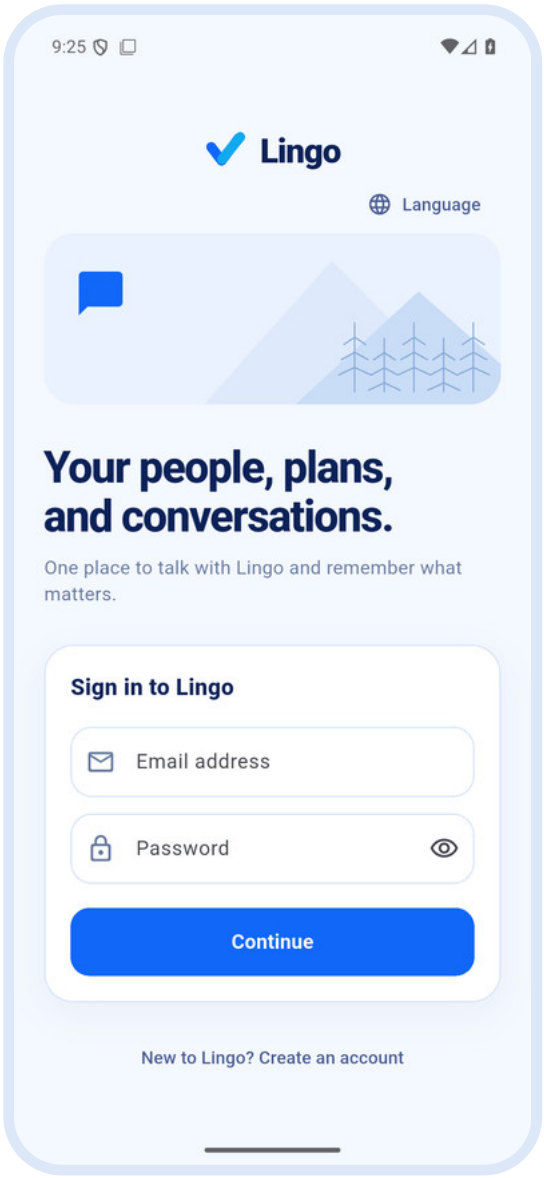

## You do not need to uninstall Lingo to update it.

Real Android screens. No real account is shown.

## 2 Create your account

07 / ONE TEST AT A TIME

# Ask. Check.
# Stars and a few words.

Choose a test, copy its example into Lingo, and change the details in brackets. Check the actual result in Gmail, Calendar or the file.

Real beta page using fictional sample feedback. Opening it does not send mail or change your accounts.

**Then choose your status, give 1 to 5 stars and describe what happened. Use Save & next to continue.**

08 / YOUR FIRST TEST ROUTE

# Useful things. Real results.

## 1 Email yourself

Send one test email to yourself. Check Inbox and Sent. Ask Lingo to find it, explain it and prepare a reply.

## 2 Try one calendar event

Create a clearly named test event. Change its time, place and details, checking Calendar after each change.

## 3 Explore at your pace

Try contacts, a document, a voice note or a QR code. The form has 50 guided checks. WhatsApp is optional.

Use your own test data. For sends and invitations, use yourself or a helper who agrees. Image generation may use your normal credits. Record Blocked when a feature cannot complete.

09 / SAVE, RETURN, SUBMIT

# No rush.
# Your notes stay.

## Saved online

Watch the save status at the top. Your notes save while you write. Wait for this confirmation before closing.

### Come back to the same link

Refreshing or reopening your personal page restores confirmed notes and stars. Offline changes need a connection before they are saved online.

## Your stars + Luna’s review

**Stars:** your average out of 5, total stars and checklist coverage. Skipped tests are not passes.
**Submit:** Luna reads your saved feedback and gives a separate reviewer grade out of 100, with issues and suggested retests. You may submit a partial test.

The reviewer grade is based on reported feedback. It does not mean Luna independently ran your tests.
